Statement reconciliation	✓ Automated	✗
Approval workflows	✓ Up to 8	✓ Advanced rules
Fraud detection	✓ Yes	✗
Multi-entity support	✓ Parent/child	✓ Yes

WHY LIGHTYEAR?

✓ AI DATA EXTRACTION

Line-item extraction across invoices, receipts, credit notes and more — data captured and ready in 15 seconds or less.

✓ CATCHES OVERCHARGING

Automated price checking flags discrepancies against your agreed supplier prices — before approval.

✓ FULL PO WORKFLOW

Create purchase orders, receive goods, and match invoices — all in one system.

✓ BUILT FOR MULTI-SITE

Parent/child accounts give finance teams visibility across every location in one dashboard.

✓ CATCHES ERRORS AT SOURCE

Automated validation flags discrepancies the moment an invoice arrives — not after it's been approved and paid.

✓ STATEMENT RECONCILIATION

Automatically match supplier statements against your records to catch missing, duplicate, or mismatched invoices — before they become a problem.
