Multi-entity support Parent/child accounts	✓ Yes	✓ Basic

WHY LIGHTYEAR?

- ✓ AI DATA EXTRACTION
Line-item extraction across invoices, receipts, credit notes and more — data captured and ready in 15 seconds or less.
- ✓ CATCHES OVERCHARGING
Automated price checking flags discrepancies against your agreed supplier prices — before approval.
- ✓ FULL PO WORKFLOW
Create purchase orders, receive goods, and match invoices — all in one system.
- ✓ BUILT FOR MULTI-SITE
Parent/child accounts give finance teams visibility across every location in one dashboard.
- ✓ CATCHES ERRORS AT SOURCE
Automated validation flags discrepancies the moment an invoice arrives — not after it's been approved and paid.
- ✓ STATEMENT RECONCILIATION
Automatically match supplier statements against your records to catch missing, duplicate, or mismatched invoices — before they become a problem.
