Lightyear Wins When...

Native PO creation (Traild has none)

Automated price checking vs agreed rates

Published transparent GBP & AUD pricing

Purpose-built for UK & APAC markets

Broader accounting software integrations

Why Lightyear?

✓ Controls what you agree to pay

Traild protects your payments from fraud; Lightyear controls what you're agreeing to pay before the payment is ever made.

✓ PO creation built in

Lightyear creates purchase orders natively. Traild is focused on AP and payments but has no PO creation.

✓ Price checking automation

Lightyear checks every invoice against agreed supplier prices. Traild focuses on fraud detection, not price accuracy.

✓ Published transparent pricing

Lightyear publishes GBP and AUD prices. Traild pricing is tiered but requires a sales conversation.

✓ Broader market focus

Lightyear serves UK and APAC with native integrations for Xero, MYOB, QBO, Sage, NetSuite and more.
