- Statement reconciliation automation
- More approval levels needed

WHY LIGHTYEAR — KEY DIFFERENCES

Before the Payment

Traild protects your payments from fraud. Lightyear controls what you're agreeing to pay before the payment is ever made — catching errors at invoice stage.

Purchase Orders

Lightyear creates POs natively and performs 3-way matching against delivery receipts. Traild has no PO creation or 3-way matching capability.

Price Checking

Lightyear automatically checks invoice prices against your agreed supplier rates. Traild has no automated price checking.

Statement Reconciliation

Lightyear automates supplier statement reconciliation. Traild has no statement reconciliation capability.

8 Approval Levels

Lightyear supports up to 8 approval tiers vs Traild's 5 — critical for complex multi-entity businesses.
