Why Lightyear?

✓ AI Data Extraction

Line-item extraction across invoices, receipts, credit notes and more — data captured and ready in 15 seconds or less.

✓ Catches overcharging

Automated price checking flags discrepancies against your agreed supplier prices — before approval.

✓ Full PO workflow

Create purchase orders, receive goods, and match invoices — all in one system.

✓ Statement Reconciliation

Automatically match supplier statements against your records to catch missing, duplicate, or mismatched invoices.
